Connection
Straight
90ํ 2-way
3-way
4-way

Connectors
1 pair - QC180
1 pair - QC90
2 pair - QC90
3 pair - QC90

Tools required: None

## Installation:

- With help, align panels in a 90 or 180 degree configuration.
- Make sure all panel glides are leveled at the same height.
- Each 90 or 180 degree connection requires 2 brackets (1 pair) on each panel end. The location should be placed within 6 " from the top edge (of the "smallest" panel in the configuration) and 6" from the bottom edge. (see FIG. 1)
- Slip the ends of the connector between the fabricated part of the panel and the square tube and snap into place over the vertical square tube (see FIG. 2).
NOTE: The connectors are secure in place after the "snap" has occured.
- Snap the other end of the connectors into the other panel acording to the configuration.

NOTE: For 3-way and 4-way connections, the first connector is installed at 6 " the remainder of the connectors should be stacked above with no gaps (see below).
