

ED8850A/B

The Envizen Digital **Duo Box Pro** is the only portable entertainment system that allows you to watch digital TV, play DVDs, enjoy slide show of digital photos, and listen to music all on one device. With the built-in ATSC digital tuner, the Duo Pro lets you watch all available digital channels on a vivid 7" screen.

Now, the Duo Box Pro comes with a built-in rechargeable battery that makes the device even more compact and portable than ever before. You can take this lightweight device with you anywhere whether it is at home or traveling on an airplane, on a vacation, camping, or to your office. You can also use the included AC adapter to power the unit when you're close to a power outlet.

You can enjoy the Duo Box Pro:

As a Digital TV

- With the built in ATSC digital tuner, the Duo Pro is a portable digital TV that lets you view all available digital channels. No converter box or monthly subscription is needed.

As a DVD Player

- The built-in anti-shock buffering technology allows you to receive a great DVD picture even on bumpy roads.
- With the Duo Pro's disc resume capability, it remembers exactly where you left off in your movie if you leave DVD mode. Just switch back to DVD mode and continue watching your favorite movie from where you left off.

Free bonuses

- Carrying case – Allows for maximum portability and convenience.
- Car adapter – Plug in the car adapter to enjoy viewing in car or charge on-the-go
- External antenna - Comes with a magnetic base that can be placed in different areas for optimum signal reception.

Portability

Battery

- Internal battery with 2.5 hours of rechargeable life. Watch a full-length movie without having to recharge.
- Lightweight and handheld.
- You can purchase an additional external battery for longer life.

Travel companion

- The Duo Pro includes a car adapter so you can charge it up on the go.
- Free carrying case for protection.
- The carrying case mounts to the back of your car seat.

As a media player

- Use the USB 2.0 cable or insert a memory card to view digital photos, home videos, or music files.

As a monitor

- Connect to any device that has AV output: game console, camcorder, etc.
