

USB 3.1 Gen 1 (5 Gbps) to VGA Dual/Multi-Monitor External Video Graphics Card Adapter, 512 MB SDRAM, 2048 x 1152, 1080p

MODEL NUMBER: **U444-06N-VGA**

Description

The U444-06N-VGA USB 3.1 Gen 1 to VGA Dual/Multi-Monitor External Video Graphics Card Adapter lets you connect an additional VGA monitor, television or projector to the USB Type-C (USB-C) port on your computer, tablet, Ultrabook or smartphone. It's an ideal tool for creating digital signage, multitasking, viewing large spreadsheets across screens, editing documents, giving presentations at trade shows and conferences, or playing games and watching movies on large screens.

You can extend video from your primary display to another or duplicate the same desktop on both displays. No external power supply is needed. You can use up to six U444-06N-VGA adapters at the same time, connecting up to six additional monitors to a single Windows computer. Just connect the built-in USB-C cable to the USB-C port on your smartphone, tablet, Ultrabook or computer. Then, connect the adapter's VGA port to a monitor using a VGA cable to see and hear full high-definition (HD) audio and video.

The U444-06N-VGA supports USB 3.1 Gen 1 data transfer speeds up to 5 Gbps, which is ten times faster than USB 2.0. It also supports HD video resolutions up to 2048 x 1152 (60 Hz), including 1080p. It's compatible with Windows 7 and later, as well as Mac OS X 10.8.5 and later. Stow it away conveniently in your laptop bag or backpack to use it anywhere.

USB Type-C™ and USB-C™ are trademarks of USB Implementers Forum

Features

Easy to Add a Display

- Adds a VGA monitor, television or projector by connecting it to the USB Type-C (USB-C) port on your computer, tablet, Ultrabook or smartphone
- Extend video to a second monitor, or duplicate the same desktop on both monitors
- Ideal for creating digital signage, multitasking, viewing spreadsheet data, editing documents, giving presentations, watching movies and playing video

Highlights

- Extend video to a second display or duplicate one desktop on both
- Supports HD video resolutions up to 2048 x 1152 (@ 60 Hz)
- Supports USB 3.1 Gen 1 data transfer rates up to 5 Gbps
- No external power supply required
- Compatible with Windows and Mac

System Requirements

- Windows 7 and later or Mac OS X 10.8.5 and later (32- and 64-bit versions)
- Computer with USB-C port and at least 1.2 GHz single-core CPU and 512 MB of RAM
- VGA-enabled monitor
- Supports Surface tablets running non-RT operating systems

Package Includes

- U444-06N-VGA USB 3.1 Gen 1 to VGA Dual/Multi-Monitor External Video Graphics Card Adapter
- Driver CD
- Owner's manual

games

- Add up to 6 adapters to connect 6 additional monitors to one Windows computer
- No external power supply required
- Stows away conveniently in laptop bag or backpack for easy traveling

Vibrant, Superior Video Quality

- Supports high-definition video resolutions up to 2048 x 1152 (@ 60 Hz), including 1080p
- Supports USB 3.1 Gen 1 data transfer rates up to 5 Gbps—10 times faster than USB 2.0
- Resumes automatically from hibernation and suspend modes

Works with Windows and Mac

- Compatible with Windows 7 and later (32- and 64-bit versions)
- Compatible with Mac OS X 10.8.5 and later (32- and 64-bit versions)
- Features 512 MB DDR2 SDRAM of memory

Specifications

OVERVIEW	
Cable Type	USB; VGA
ENVIRONMENTAL	
Operating Temperature Range	10 to 40 C (50 to 104 F)
Storage Temperature Range	-10 to 80 C (14 to 176 F)
Relative Humidity	Less than 85%, Non-Condensing
CONNECTIONS	
Connector A	USB C (MALE)
Connector B	HD15 (FEMALE)
SPECIAL FEATURES	
Chromebook Compatible	Yes
WARRANTY	
Product Warranty Period (Worldwide)	1-year limited warranty
