Description

The N201-SR2-BL Cat6 Gigabit Molded Slim UTP Patch Cable is perfect for connecting network components like printers, computers, copiers, routers, servers, modems and switches in high-density data centers. Designed for fast transmission and excellent signal quality, this 2-ft. (0.61 m) blue cable ensures peak performance throughout your local area network (LAN).

Manufactured from 28 AWG copper wire, the four-pair stranded UTP N201-SR2-BL delivers speeds up to Cat6 Gigabit/1 Gbps. Protected by a PVC jacket, this cable is more than 35% smaller in diameter than standard Cat6 cable, which increases airflow in tight spaces and makes it easier to install around corners and through cable management panels.

Space-saving right-angle RJ45 male connectors are easy to plug into patch panels and switches located in adjoining spaces inside a rack. Integral strain relief ensures the cable and connectors last a long time.
