Lenovo Performance FHD Webcam

Conference smarter with facial recognition.

Designed to enhance every conference call, the Lenovo Performance FHD Webcam captures everything in superb 1080p and delivers uninterrupted FHD UVC-compliant video. Thanks to temporal-domain noise reduction (3DNR), it offers better video quality under various circumstances. Compatible with desktops and laptops, its facial recognition feature allows multiple users to login effortlessly and securely via Windows Hello. And with built-in dual microphones, it can capture audio from up to 2 meters away, so everyone in the room can have their say.

Why you need the Lenovo Performance FHD Webcam

Studio-quality video conferencing

With a 1/2.9-inch RGB sensor, 95° lens, and 4x digital zoom, this 1080p FHD Webcam allows users to set the scene for every call. What's more, dual microphones pick-up voices within a 2-meter range, accurately and clearly.

Very flexible, very secure

The Lenovo Performance FHD Webcam features a range of mounting options, from top-of-monitor to tripod, with wide-angle pan/tilt controls and 360° lens rotation support. And for extra security, it has a sliding privacy shutter.

Business-ready, pocket-friendly

With advanced face recognition technology, this Windows Hello (4.1) FHD Webcam enables multiple users to login securely, easily-without entering a password or switching accounts. It's also very affordably-priced, too.
