

AMRPHONEBOOK

Desk Monitor Riser Stand

Reduce computer-related strain on your eyes, neck, and back with Amer Mounts' AMRPHONEBOOK monitor riser stand. This handy desk add-on elevates your monitor to eye-level, promoting healthy posture and alignment. Studies show that long-term computer use can put a profound strain on your eyesight as well as your spine.

By elevating your monitor to eye-level, you can automatically align

your posture to a healthier position, reducing sore neck and stiffening at the end of a long work day. Save space by storing your keyboard and mouse under the stand while they're not in use. Use at the office or at home to create a stress-free environment for working, gaming, or web surfing.
