Safety Instructions

Please read the following safety instructions before using your Plantronics headset and accessories. Keep these instructions for future reference. These basic safety precautions and warnings should be followed to reduce the risk of fire, electric shock, injury to persons and damage to property.

⚠️ WARNINGS

- Only use Plantronics accessories designed for this product.
- CHILDREN. Never allow children to play with the product—small parts may be a choking hazard; cords may cause strangulation.
- Do not insert anything into the product because this may cause damage to the internal components or cause injury to you.
- Avoid contact with liquids.
- Discontinue use and contact Plantronics if the product overheats, has been damaged or has a damaged cord or plug.
- If you experience a skin irritation after using this product, discontinue use and contact Plantronics.
- Exposure to high volume sound levels may damage your hearing. Although there is no single volume setting that is appropriate for everyone, you should always use your headset or headphones with the volume set at moderate levels and avoid prolonged exposure to high volume sound levels. The louder the volume, the less time is required before your hearing could be affected. You may experience different sound levels when using your headset or headphones with different devices. The device you use and its settings affect the level of sound you hear. If you experience hearing discomfort, you should stop listening to the device through your headset or headphones. To protect your hearing, some hearing experts suggest that you:
 1. Set the volume control in a low position before putting the headset or headphones on your ears.
 2. Limit the amount of time you use headsets or headphones at high volume.
 3. Avoid turning up the volume to block out noisy surroundings.
 4. Turn the volume down if the sound from the headset or headphones prevents you from hearing people speaking near you. See plantronics.com/healthandsafety for more information on headsets and hearing.
