

## StandSafe™ PERSONAL SPACING DISKS

We hope you enjoy your new Personal Spacing Disks. For long-lasting use, we recommend regular cleaning and routine maintenance.

Before placing your disk on the floor, make sure the surface is clean and free of debris and moisture. Disks are most suitable for use on hard floor surfaces\*

### INSTALLATION

**1** Peel off protective backing

**2** Place disk on a clean floor

**3** Apply pressure to set securely in place

### CLEANING

**1** If your disk has lost its grip, gently wipe the bottom side with a cool damp cloth

**2** Make sure your disk and floor surface is clean and dry before repositioning

\* We know everyone loves their beautiful hardwood and laminate floors and to protect them, we don't recommend the use of these StandSafe™ Spacing Disks on these surfaces.
